## IMPORTANT NOTICE

### RE: BUILDING INSPECTION REPORTS

---

In keeping with its primary mandate of bringing much needed services to the people within its boundaries, the Thompson-Nicola Regional District was one of the first in the province to implement building inspection services.

Commencing 27 years ago, most construction other than that within the City of Kamloops required a building permit from the TNRD and subsequent inspections at various stages of development.

In most cases, building permits were actually taken out when required, however, in very few of those cases did the owners fulfill their responsibility to call for all of the required inspections.

For the seven years ending December 31, 1998, a total of 7,069 building permits were issued but only 1,341 received final inspections.

Apparently, the same situation also seems to be prevalent in other Regional Districts that provide Building Inspection services.

Unfortunately, due to changing Building Codes, inaccessibility of works and in some cases subsequent development, it is now neither possible or nor practical to perform final inspections on those works.

To lessen whatever repercussions this situation may have on property owners, the TNRD Building Department will continue to receive and disseminate any mitigative information such as independent inspection and engineering reports, details of any upgrading or builder warranties offered or whatever other information property owners may wish to provide to prospective enquirers.

It is important, however, to emphasize that it is the owner's responsibility to call for inspections and comply with the B.C. Building Code.

#### **Pre 1999 Construction:**

Although whatever information is held on file pertaining to any particular property will be provided upon request, ***in most cases the Regional District will be unable to provide proof of final inspection and compliance with the BC Building Code on construction occurring prior to 1999.***

***Prospective buyers and other interested parties may wish to consider retaining the services of an independent property inspector to satisfy themselves of the state of condition of any property lacking final inspection by the TNRD.***

#### **Post 1998 Construction:**

*In order to achieve a higher percentage of compliance with the inspection requirements of the Regional District Building Bylaw, procedures are currently being implemented to remind owners of their responsibility under the B.C. Building Code to call for all required inspections.*
